

InVault: Find your asset blind spot before your next audit

Know what you own, where it is, who has it, and what happened to it before audit prep becomes a manual scramble.

WHERE BLIND SPOTS SHOW UP

Location visibility gaps

Assets are in the system, but not where records say they are.

Ownership & transfer gaps

Shared assets move between people, rooms, and sites without a clear chain of custody.

Maintenance & certification gaps

Service, calibration, and lifecycle status are disconnected from the asset record.

Manual audit burden

Relying on spreadsheets, physical searches, and last-minute reconciliation.

BUILT FOR ASSET-INTENSIVE ENVIRONMENTS

SLED

Public-sector accountability across departments and sites.

Healthcare

Clinical and biomedical equipment readiness.

Labs

Instrument, specimen, and shared equipment visibility.

Warehouse

Warehouse assets, MHE, yard, and storage accountability.

HOW INVULT HELPS

Locate & inventory

Movement history

Ownership & transfers

Maintenance & lifecycle

Audit-ready reporting

FLEXIBLE TECHNOLOGY FIT
